

UPDATE ON MOUNT AGUNG 30 APR 2018

Dear Guests,

Mt. Agung continues to show activity amid its status at level III (standby). Yesterday, 30 April 2018, there was a volcanic eruption at 22:45 WITA with an ash column +/-1500 mtrs above the peak (4642 m above sea level). The eruption was accompanied by a volcanic tremor lasting 172 seconds. An aviation notice (VONA) was issued showing wind direction South West, away from Gaia-Oasis and with no impact on commercial flights.

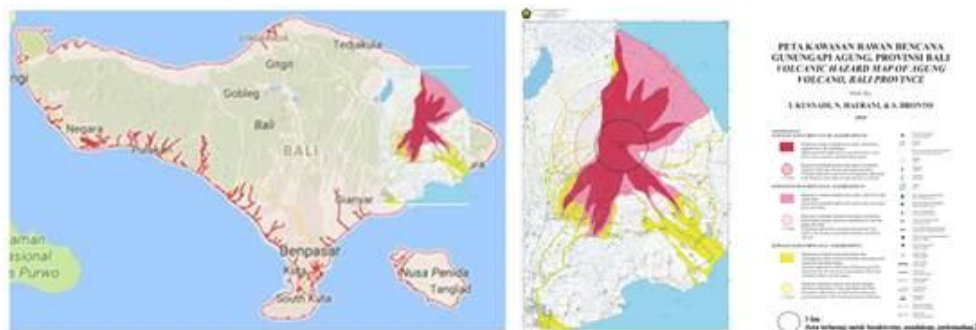

Mt. Agung has had 3 smaller eruption in April, all with ash columns about 500 mtrs high. These eruptions occurred on Sunday 15/04/2018, Wednesday 11/04/2018 and Friday 06/04/2018 respectively.

The danger zone remains within 4 km of the crater, far from Gaia. Please see map below.

Bali Airport remains open and is functioning normally. Gaia-Oasis is monitoring flight alerts and ash reports daily. We have prepared a detailed options guide and we offer 1 night's free stay in the unlikely event that your flight is delayed due to Airport closure.

We emphasise that Gaia-Oasis is not in the path of the volcano;
We are in a Safe Evacuation Zone housing many refugees, over 30kms NW of Mt Agung.
Gaia is only at low risk of ashfall, which generally does not pose any longer-term risks for people without chronic lung conditions or severe heart disease.
We will not be subject to volcanic gases, lava flow or any life-threatening situation.

Gaia receives updates within a short period of any major event from local authorities.
We will continue to keep you updated on important changes.

We ask for your prayers that the situation of Bali will soon return to normal

Om Shanti Shanti Shanti Om
Putu and the Gaia Oasis Team
