

## DEAR GUESTS

Yesterday evening, an earthquake at 7.0 on the Richter scale occurred in Lombok, followed by a several smaller aftershocks including a 5.6 SR tremor. The main quake, located 155 km away, was felt in Tejakula and throughout Bali.

Based on the official report from BMKG, the series of earthquakes triggered a tsunami early warning for North, East and West Lombok areas only. The highest wave predicted was 0,5 meters for the coastline in east of Lombok. At 21:20 the tsunami early warning was lifted.

There is no tsunami warning reported for Bali and it is still safe to travel in Bali. There were only a few damaged buildings reported with no casualties in Bali.

Bali Airport is operating normally.

For further information, please see the official website of BMKG <http://www.bmkg.go.id>

Please read the safety folder in your room for earthquake preparation information. Gaia-Oasis staff have been trained and will assist you in the event of any earthquakes or tremors.

Gaia-Oasis receives information from the BMKG as well as the Emergency Response Team in Tejakula on all earthquakes and potential tsunami events, within minutes of any activity being detected. We will keep you updated as we receive further notices.
